**Molly**

Licensed Aesthetician

**Nadine**

Registered Medical Assistant

**DERMAPLANING**  
Anti-aging  
Skincare Treatment  
Without the Chemicals

Dermaplaning is a quick, noninvasive, painless procedure in which surface dead skin cells are manually scraped away. There is no recovery time involved with this procedure. As an added bonus, it removes the fine vellus hair on the face, which can trap oil and dirt, leading to other skin problems. Once the fine hair, dirt, oil and dead skins cells are scraped away, skin products and treatments are more effective because they penetrate more deeply.

**Dermaplane**

May be added to any facial or peel

Hi, Cheekbones!  
New Juvederm Voluma Adds  
Volume And Lift To Your Cheeks

## BOTOX AND FILLERS

**Botox®** Cosmetic is used to reduce or eliminate the appearance of facial wrinkles. Botox is injected under the skin into the muscles that form wrinkles in the forehead, upper bridge of the nose, around the eyes and mouth.

**Juvederm®**, one of the most recent hyaluronic acid fillers approved by the FDA, helps to fill aging lines or wrinkles, enhance the lip border and size and shape of the lips.

**Voluma®** is the first and only FDA-approved filler to instantly add volume to the cheek area. It gives you a subtle lift, helping to restore a more youthful contour and profile and can last up to 2 years with optimal initial correction.

## SCLEROTHERAPY

Treatment of spider veins of the legs.
